Dear reader,

Isn't it amazing how time flies? Another covid-19 year is around, another year of restrictions and limitations both in private life as well as in professional life including science. For our journal it was quite a regular year. All operations and processes ran smoothly and I am grateful to EB members, reviewers and technical support team for their valuable contribution to the success. All papers published are open-access and accessible in WoS, Scopus, DOAJ or on the journal web pages by a single mouse click. Do open-access papers help us in wider dissemination and larger readership? We are tracking the numbers and the trends look promising.

In 2021 we received more than 141 manuscripts, out of which only 22 have been accepted for publication so far, while 25 were out of scope and 56 manuscripts were rejected. The success rate remains low (below 20% in 2021) primarily because we receive many manuscripts that do not meet the quality and scientific originality that we aim at. Citation metrics with JCR IF-2020=0.442, SNIP-2020=0.284 and CiteScore-2020=0.80 is an important performance indicator. In 2021 we published 2 review scientific papers (on microfluidics and on nanotechnology and nanoscience) and 22 original scientific papers.

We commit ourselves to continue serving you as a part of your success in science and engineering and look forward to receiving your future manuscript(s) on our submission page (<http://ojs.midem-drustvo.si/>).

Stay safe and healthy!
